

Objective

To explore all avenues of the computer graphics genre. I have empirical as well as trained knowledge in 2D software (photo manipulation/restoration), as well as 3D (object modeling, texture, lighting, rendering), vector (any/all), animation (flash/animated gifs), and video (converting, scaling for different mediums, editing). I would like to extend my experience and grow in my abilities.

Freelance Experience

G. L. Rittenhouse: Professional CD & Website

Created entire website from scratch, multiple versions of content on CD's to be sent out to potential clients. Photographed sculptures and paintings, used them to create interactive animations. Organization and upkeep. Video editing. Computer training.

Jill Deckard: Cre8tivephotography.com

Webpage development based off consistent input from client. Instructed client upon request in photo editing techniques. Created interactive 3D menu system.
